SKILLS

- **Languages:** C++, JavaScript, C, python, java
- **Frameworks and Tools:** HTML, CSS, Power BI, MS Excel, Git, GitHub, Django, DRF
- **Technologies:** YouTube Data API, OpenCV, NumPy, Keras, JWTAuthentication
- **Soft Skills:** Problem-Solving, Team Collaboration, Project Management, Adaptability

PROJECTS

Mood based Sound recommender| GitHub: March 2025 – April 2025

- Built a full-stack Mood-Based Music Recommendation System that uses the YouTube Data API to dynamically fetch tracks and deliver mood-matched playlists through an interactive web interface.
- Implemented client-side mood selection, search, and playback logic enabling users to pick moods like "Chill", "Party", "Romantic" and instantly get a curated song list tailored to their emotional state.
- Demonstrated strong web-development and software-engineering skills through a responsive, device-agnostic design and seamless user experience, showing ability to combine frontend, API integration and user-centric functional design.

Tech stacks: HTML5, CSS3, JavaScript, YouTube Data API, Responsive Web Design

Real-time Face Mask Detection| GitHub: September 2025 – October 2025

- Developed a real-time face mask detection system using Python, OpenCV, and deep learning (TensorFlow/Keras) to identify masked and unmasked faces from live webcam feed.
- Executed MobileNetV2-based transfer learning model for accurate mask/no-mask classification, achieving efficient performance on real-time video input.
- Performed data preprocessing and augmentation using Python and NumPy to enhance model accuracy and robustness across diverse facial images.

Tech stacks: Python, TensorFlow/Keras, OpenCV, MobileNetv2, NumPy, Dataset Handling Argumentation

File Management And Security| GitHub: February 2025 – March 2025

- Designed an interactive web platform explaining core OS file-management concepts such as file directories, allocation methods, access methods and free-space management.
- Deployed a clean and responsive UI using HTML, CSS and JavaScript to present file-system workflows, diagrams and security mechanisms in an easy-to-understand manner.
- Covered key security topics including file protection, permissions and organization, demonstrating strong understanding of operating-system level file handling.

Techn stacks: Html5, CSS 3, JavaScript, Image/ Visual Diagrams

TRAINING

Prayas Welfare Association: June 2024 – August 2024

- Helped run community workshops and awareness drives targeting sanitation and child welfare in the Shivpur area, in collaboration with NGOs India and funding agencies.

CERTIFICATES

Master Generative Ai and Generative Ai Tools – Infosys| Link — August 2025

Data Structures and algorithms – IAMNEO| Link — December 2024

ACHIEVEMENTS

- Secured 2ND Rank among 50 Teams in a university-level hackathon.
- Organized and led a Fine Arts Competition on "Future Vision of Today's University" as part of Magnitude Tech Fest, managing participants, coordinating logistics, and ensuring smooth execution of the event.

EDUCATION

- **Lovely Professional University** — Punjab, India
  Bachelor of Technology - Computer Science and Engineering |**CGPA: 7.0** — August 2023 - Present
- **Sant Atulanand Convent School** — Harahua, Varanasi
  Intermediate|**Percentage:72** — April 2020 - June 2022
- **Sant Atulanand Convent School** — Harahua, Varanasi
  Matriculation|**Percentage:74** — April 2018 - March 2020
